Cal Poly's Information Technology Services (ITS) offers a wide range of technology services and resources in support of student success. ITS gives students access to the My Cal Poly Portal where they can view online course materials (PolyLearn), use online course planning tools (PolyPlanner), and get information about their progress towards degree (PolyProfile). They also provide each student with a Microsoft Office 365 account, including email, calendar, cloud storage and more. A number of other software titles are available to students at no or low cost and can be found at: servicedesk.calpoly.edu/software. The ITS Service Desk, located in Building 46, offers assistance with Cal Poly accounts, PolyCards, connecting to Wi-Fi, and other campus technology needs.
