Program Learning Objectives

1. Apply and synthesize technical knowledge to solve solutions to advanced Civil and Environmental Engineering problems in a chosen subject area of mastery (Environmental, Geotechnical, Structural, Water Resources, or Transportation Engineering).

2. Demonstrate the ability for lifelong learning necessary for the constantly evolving nature of engineering design and practice.

3. Effectively communicate technical information orally and in writing.

4. Demonstrate independent thinking and decision making skills.

5. Integrate ethical and professional components into the solutions of complex engineering problems.

6. Evaluate engineering systems for sustainable performance and create solutions to encompass a project’s full lifecycle.

Required Courses

<table>

</table>

Select one of the following options: 9

- CE/ENVE 599 Design Project (Thesis)
- Or 9 units of advisor approved analysis and design electives within the major (nonthesis option)

Advisor approved analysis and design electives within a specific area of focus

Select from the following: 20-26

**Advisor approved electives outside the primary area of focus**

Approved electives outside the primary area of focus $^1$ | 8-14  
---|---  
**Total units** | 45

$^1$ To be selected after consultation with your academic advisor and the CE/ENVE graduate coordinator

$^2$ No more than 4 total units of technical elective credit from CE 400, CE 500 and ENVE 400, ENVE 500 combined.
