PACKAGING CONCENTRATION

Packaging continues to grow beyond being a logistical or materials issue to a strategic business function aimed at creating value. The Packaging Concentration emphasizes on the entire packaging value chain and includes the disciplines of engineering, material science, design and business. Students are encouraged to leverage their personal interests to focus on a multitude of industry sectors such as food, automotive, healthcare and electronics. The highly sought out graduates are provided with opportunities to engage with a multitude of groups ranging from R&D through purchasing, production, sales and management.
